

About Us

About Us

The Association's mandate is to improve on existing industry practices, to build strength and unity within the industry and to provide policies and guidelines to enable Mechanical Contractors to plan and expand in the developing market of this industry

To assist in more effective planning for the industry's current and future labour requirements, MCAT is working with UA Local 46 and the Ontario Construction Secretariat (OSC) to develop a model which will be used to project the demand for pipe trades in the Greater Toronto Area.
